

The ES-1 CONTRACTOR EDGE SYSTEM PROGRAM is designed to give qualified licensed RedShield™ contractors the ability to self-fabricate ES-1 edge systems to complete Elevate RubberGard™ EPDM, UltraPly™ TPO, PVC or Modified Bitumen roof systems. ES-1 Edge System projects can qualify for up to a 20 year, 90 mph Red Shield™ Limited Warranty. The Elevate ES-1 Contractor Edge System Program simplifies the edging process by enabling Red Shield contractors to purchase pre-made 22 Ga. Galvanized Steel ES-1 certified cleats to terminate membrane during construction phase, then fabricate ANSI-SPRI ES-1 metal edge covers to the downloadable build-details on their own timeline.

The Elevate ES-1 Contractor Edge System Program requires all contractors to complete an online registration and approval process.

PROGRAM HIGHLIGHTS

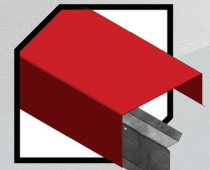

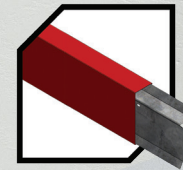

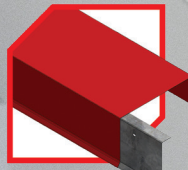

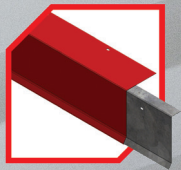

- Up to 20-Year, 90 MPH Wind Warranty
- Slotted fastening holes allow proper thermal movement and easy installation
- Fasteners included to minimize material costs
- Purchase ES-1 cleats with your Elevate membrane. Fabricate edge metal covers per the fabrication details on your own schedule
- Easy online application and 3rd Party ANSI / SPRI / ES-1 qualification program with no enrollment fees
