

Post Warranty Alteration Form

Date: _____

Please Select System Type: Elevate: _____ GenFlex: _____ Gaco: _____

Project #: _____ or Warranty #: _____ Exp. Date: _____

Building Identification: _____

Building Address: _____

Owner: _____

Type of Post Warranty Alteration:

- General Roof Alterations
- Vegetative Roof System
- Photovoltaic (PV) Installation

General Alterations or Garden Roof projects only:

Thank you for your notice of alterations to the warranted Holcim roof system on the above referenced building. All attempts should be made to involve the original installing contractor to make the necessary repairs. Only currently licensed contractors are permitted to perform alterations and repairs to a warranted roof system.

Holcim Building Envelope, a division of Holcim Solutions and Products US, LLC ("Holcim") reserves the right to require a Post Warranty Alteration (PWA) inspection upon review of the submitted documents. The purpose of the PWA Inspection is to verify new membrane flashings or other membrane-related alterations comply with Holcim's written repair recommendations. The charge for a required or requested inspection is \$750.00, payable to Holcim Solutions and Products US, LLC. **No payments will be accepted prior to the issuance of a Holcim invoice.** The invoice will be directed to the owner listed on the warranty unless a third party is responsible for payment and separate billing information has been provided.

Holcim requires the following information in order to update the existing warranted project, and for the existing warranty to remain in full force:

Licensed Contractor's Name: _____

Contractor's License #: _____

I certify the following is attached to this document: (all boxes must be checked)

- Contractor license number and name of contractor performing repairs
- Before and After photos clearly showing scope of work performed
- Submit description of work performed including all flashing and/or other details used
- Roof Drawing indicating location of Alterations or Additions

Alterations over \$10,000.00 YES NO

Photovoltaic (PV) projects only:

This form and all requested information should be submitted **after** the PV installation has been completed. An inspection by a Holcim Representative **may** be required upon review of the submitted documents and completion photos. The purpose of the PWA Inspection is to verify new membrane flashings or other membrane-related alterations comply with Holcim's written repair recommendations. **Holcim does not perform pre-installation inspections of PV projects.**

I certify the following information is attached to this document: (all boxes must be checked)

- Name of PV Manufacturer
- Drawing to include proposed PV layout and Roof Plan
- Overburden waiver completed and signed by the Building Owner **ONLY**
- PV rack manufacturer's detail drawing for the installed PV system.
- PV Install completion date
- Proposed protection/slip sheet materials
