

Elevate SBS Modified Bitumen 180 Base / 250 Cap

Elevate 180 Base and 250 Cap SBS Modified Bitumen roofing systems provide a durable, long-term commercial roofing solution, backed by Holcim's 30+ years of experience with SBS systems. Featuring a proprietary formulation, Elevate 180 Base and 250 Cap systems are durable and exceptionally strong. With a complete line of base and cap sheets, including all related accessories, you can trust that your roofing system will provide long-term performance.

20 YEAR
ELEVATE RED SHIELD
WARRANTY

STABILITY & STRENGTH

A high-quality single reinforcing fabric that embeds glass-fibre filaments in a non-woven polyester mat. This fabric provides superior puncture resistance, while the glass-fibre filaments add dimensional stability and tear strength.

LONG LASTING

A proprietary blend of rubber polymers combined with select grades of refined asphalt for a durable and robust product.

VARIETY OF APPLICATION METHODS

Including cold applied, heat welded, and systems with hot asphalt.

LESS LABOUR

Large membrane sheets that require less labour and fewer seams during installation. Fire Retardant sheets are also available for added protection.

VARIETY OF COLOURS

Cap sheets are available with Black, White, and UltraWhite granules.

TRUSTED EXPERTISE

Over 30 years of experience with SBS Roofing Systems across North America.

SPECIFY AND INSTALL WITH CONFIDENCE

Elevate SBS Modified Bitumen systems have a proven history of performance in the market and are backed by the industry-leading Elevate Red Shield Warranty.

Elevate SBS Modified Bitumen systems are CSA A123.21, FM, UL and CCMC approved.
