

Technical Information Sheet

Termination Bar

Packaging	Part Number
50 pieces of 3.05m per cardboard tube (152.4m)	W56RAC3061

Description

The Elevate™ Termination Bar is an aluminium profile in C-shape that is designed for attachment and termination of the Elevate membrane against upstands with a smooth and even finishing surface such as concrete, steel, etc

Application

Termination Bar can be applied in following Elevate systems: RubberGard™ EPDM, UltraPly™ TPO, GeoGard™ EPDM, PondGard™ EPDM, GeoSmart™ EPDM, RubberGutter™ EPDM and RubberWall™ EPDM.

Preparation

Substrate must be sound, smooth, dry and free from dust, dirt, oil and other contaminants prior to installation. Termination Bar must be installed above water level. Wall substrates above the Termination Bar must be waterproof.

Method of Application

Apply a bead of Elevate Water Block Seal or other appropriate sealant between the flashing membrane and the wall at 20 mm from the edge. Anchor the Termination Bar through the pre-punched holes with an acceptable fastener at a rate to maintain a good, tight compression of the sealant against the wall (maximum 200 mm). Install flat side towards flashing. Remove all excess of mastic that exceeds above the bar and apply Lap Sealant or another high grade sealant into the channel on top. Refer to the Elevate guidelines for specific installation instructions.

Coverage

In accordance with the length of the detail.

Characteristics

Technical	
• Material	Corrosion-resistant aluminum
• Length	3.05 m
• Width	27.4 mm
• Thickness	2.2 mm
• Holes	7.1 x 9.9 mm slotted holes at 100 mm o.c.

Storage

Dry and clean in original unopened packaging protected from the weather.

Shelf Life

Unlimited, if stored in the above-mentioned conditions.
